

**Daycare Services:** We have a separate daycare wing, with easy front access and two large classrooms. This is a government daycare program for kindergarten to grade 2 at \$8.20 per day (with a minimum enrolment of 3 days per week as per the Ministère de l'Éducation et de l'Enseignement supérieur (MEES). Part-time daycare is available at a higher rate of \$12.50 per day for 1 or 2 days a week. Lunch supervision is included. For those not registered in daycare and opt for lunch supervision services only, the cost is \$2.25 a day. The Daycare is open from 7:00 to 8:00 and 14:30 to 18:00 during school days. On pedagogical days the daycare is open from 7:00 – 18:00. For Daycare services, students must be registered. All inquiries for daycare and lunch services are to be addressed to the daycare technician, Tracey Brenie, at (514) 697-5699. All fees are subject to change on an annual basis.

**School Bussing Services:** In general, if any Kindergarten child lives more than one half mile (0.8 km) away from the school and is “zoned” to come to this school, bussing will be provided by Lester B. Pearson School Board\*. Bussing is provided for students in Grades 1 to 2 who live within the school territory, but more than one mile (1.6 km) from the school\*.

\* Exceptions: No bussing is provided for students who do not reside in the school territory or for those students who live within walking distance of another Lester B. Pearson school offering a similar program.

SHOW YOUR  
HAPPY BEAK PAWS

We believe that learning is directly dependent on children's attitude towards the task of learning. Children excited about learning

and focused on getting along with others will do their best in school. We implement Positive Behaviour Intervention and Support through our Sustainable Happiness PAWS Program, which is based on encouraging students to PAWS. Our program guides students to ensure success by creating a positive, safe, and nurturing environment.

Lester B. Pearson School Board

Commission scolaire Lester B. Pearson

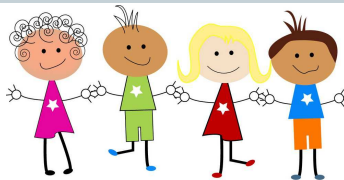

**Physical Education:** The goal of the Physical Education Program is to encourage students to develop and improve their physical, mental social and emotional well being through physical activities.

**Music:** Students are introduced to music through exploring various genres of music, instruments, rhythms, dance, singing, and more. During the year, students have the opportunity to showcase what they have learned in various school assemblies.

**Facilities:** Our school is surrounded by ample green space bordering a park, baseball and soccer fields and hockey rink, and forest. The children have access to a large fenced-in playground with jungle gyms, artificial turf, grass, pavement, park benches and an outdoor classroom. The school is housed in a two-storey building. The first floor houses the kindergarten students, Music Room and Bouge Room. There is a gymnasium with stage, overhead projector and screen. There is a separate wing for the daycare, with separate entrance. The cycle 1 students are on the second floor. Also on this floor is a Commons Learning Centre, Art Room, and Room to Breathe. We also have a Teaching and Learning Centre (TLC). All our classrooms have a Smart Board and there is a Lego Wall in one.

**Commons Learning Centre:** Our Commons Learning Centre has evolved from a combination library and computer lab into a full-service learning, research, and project space. The modern commons is a meeting place, typically offering at least one area where students can rearrange furniture to accommodate impromptu planning sessions or secure a quiet place to work near a window. There is also a green wall for film-

ing. In response to assignments, which have taken a creative and often collaborative turn in the past two decades, the learning commons provides areas for group meetings, tools to support creative efforts, and on-staff specialists to provide help as needed. The Commons Learning Centre supports relationships, whether these are student-to-student, student-to-teacher, student-to-equipment, or student-to-information. The learning commons is alive with the voices of students working together. It is these kinds of connections that promote active, engaged learning.

**Art Room:** The school also has a designated art room, with sink and tables to accommodate our students' creativity.

**Bouge Room:** This is a gross motor area offering the unique opportunity for students to play and have fun, while developing confidence in multiple areas of gross motor development, including climbing, running, jumping, ball skills, and balance.

**Room to Breathe:** We encourage students to practice mindfulness. This is a room dedicated to this end. Studies have shown that mindfulness in schools improves a range of cognitive, social, and psychological benefits.

**Conference/Multi-Purpose Room:** By the school lobby there is a conference/multi-purpose room that is used as a meeting room for parents and staff and also serves as a classroom for various extra-curricular activities.

**Teaching and Learning Centre (TLC):** Our TLC is an area that meets the needs of students requiring movement breaks, a quiet area to work, coaching or some academic support. It is staffed by teachers and support staff.

**Outdoor Classroom and Forest:** We have an outdoor classroom which allows our children to benefit from the forest and nature of our property. The Outdoor classroom is equipped with blackboard and stools along with a storytelling area. The school's property includes a small forest, in which students can explore nature.

**Playground Equipment and Synthetic Soccer Turf:** We have 2 playground equipment sets in each of the school yards (Kindergarten and Cycle 1). There is also a synthetic soccer turf area and basketball area in the cycle 1 yard. The yards face Heights Park which has a play area, baseball and soccer fields, and in the winter, a hockey rink. The school yard is fenced-in for safety and security.
